FLEXOR

TENDON REPAIR TOOLS

The versatile suture retriever is designed as a sheath dilator making it possible to repair tendon injuries beyond 3 weeks and up to 2 months.

Acting as a shoehorn, the transparent retractor allows for smooth passage of the tendon back into the sheath and onto the repair site.

TOBY FLEXOR TENDON REPAIR

Sheath Retractor and Suture Retriever/Sheath Dilator

TOBY Flexor Tendon Repair Tools facilitate your repair without dictating your method.

Acting as a funnel shoehorn, the novel transparent retractor allows for smooth passage of the tendon to the repair site.

- A non-traumatic tendon placement back into its sheath
- Minimization of soft tissue trauma
- Reduced surgical time and frustration

The versatile suture retriever is designed for smooth passage through the delicate tendon sheath, and can also be used as a sheath dilator.

- Easier suture retrieval
- Dilation of contracted tendon sheath

FEATURES

- Non-traumatic tendon surgery
- Easy suture retrieval within the sheath
- Minimize additional tissue trauma during tendon repair in "No Man's Land"
- Reduced surgical time and frustration
- Dilation of a contracted tendon sheath
